

DOWNRIGHT *BRILLIANT*

THE BEST SURGEONS DEMAND THE BEST EQUIPMENT.

Reach for the only 5mm laparoscope with an industry-first 1080p HD single-use camera. It's not only designed to light the way into the future of surgical imaging, it's better than what you're using today. Ready to turn on the most brilliant light in the room?

See the unimaginable with Saberscope, the first of its kind single use Saberscope is pulling laparoscopy into the future by addressing the hassles, costs, risks and waste that 35 year-old laparoscope technology carried with it for too long.
